Court of Appeal for British Columbia

**The Division of the Court of Appeal**

**RE: CA48922, Masjoody v. Simon Fraser University;**

Appellant's Letter of April 20:

Disappearing the letter by the Registry and the Court's continuing lack of response

It turned out that the Registry decided to disappear the Court's own three original copies of my letter of April 20, 2023, to the Division. The Registry, controlled by Outerbridge—who is been noticeably struggling to cover up for the enablers of the Islamist terrorists in academia—has shamelessly been denying receipt of several copies of my letter. More than 24 hours after filing four copies of my letter and following several follow-up emails to the Registry staff, while still in denial mode, the Registry claimed that around 2 PM on April 21, it sent to the Division a scanned copy of my own FILED copy of the letter of April 20, which scanned copy I had attached to an email to the Registry. The persistent lying by a department of the Court managed by Outerbridge and the clear intent to harass the appellant must be appalling to any person of integrity and decency. In light of that, the Division's lack of timely appropriate response to my letter by providing the required corrections and clarifications makes the entire conduct of the BC courts in this matter more and more worrisome.

You may access a filed copy of my letter of April 20 at:

By this letter of April 25, 2023, I iterate that:

- I need the required corrections and clarifications to make informed submissions to the Division; and
- I want to appear before the Division for an in-person and open-to-public hearing regarding whatever matter/matters that are presumably before the Division.

Respectfully,

Masood Masjoody, Ph.D.
